To Whom It May Concern:

Suzanne Ferguson has been tutoring my son for the last five months in 10th grade geometry. She has been consistent and reliable in meeting her commitment to his tutoring time. She has a broad base of knowledge in math and has demonstrated her ability to work with my son and help him understand the material. My son has ADD and anxiety/depression for which he is being treated. Suzanne has a wonderful way of interacting with my son in such a manner that he is able to achieve success on the material being covered and develop more self-esteem and confidence in his ability to handle the subject matter. She has excellent rapport with my son, who was quite reluctant at first in having a tutor at all.

Suzanne has also been an excellent communicator with myself, as well as with his geometry teacher. She has helped to develop a system by which my son is better able to complete his assignments and be successful in this class.

I am a teacher in the Minneapolis Public Schools and have been teaching for over 25 years. I think that Suzanne would make an excellent classroom teacher with her skills in dealing with people - students, parents, teachers, as well as her wealth of knowledge in the area of mathematics.

Please feel free to call me if you would like any further information or have any questions.

Sincerely,
Barbara Greenhalgh
